List of negative comments

=====

I've always used Reptisun bulbs but a while back, I decided try Exo Terra's bulb after reading about their new line of UVB lights on their website. For that previous build, I ordered a 26 watt UVB 100 bulb (formerly sold as Repti Glo 5.0 per the label) and a 26 watt Natural Light (formerly Repti Glo 2.0) but while the Natural Light fired right up (and I am quite happy with it), the UVB was dead on arrival. The UVB100 was replaced twice by Amazon but both of those were defective, too- only 1 of the coils lit.... the others were dead; so, I returned to Reptisun lights. For this latest terrarium build, I needed a 13w 10.0 Desert lamp (aka UVB150 which is the old Repti-Glo 10.0). I checked prices and as Exo-Terra bulbs were half the price of the Reptisun at the time, I decided to try one. I was hoping to get lucky and that the issue was only with the tropical bulbs (UVB100), so I ordered one- but, again, I received a defective bulb (only the first coil lights up, the others are dead). I'm not going to request a replacement this time - I went down that road before - but, instead, I'll go ahead and pay the extra for Reptisun so I get a bulb that I know will work. Outside of the UVB line, I use Exo-Terra lamps exclusively and it appears that it is just their newly designed UVB's that are problematic (I'm 4 for 4 in terms of bad bulbs); however, the Natural Light bulb which is the old Repti-Glo 2.0 work well. For comparison purposes, I've now purchased approximately 2 dozen Reptisuns through Amazon, and only two have had issues- both which came bundled with a fixture. The last time, I contacted ZooMed and they immediately replaced the bulb so I cannot complain. It's a shame as the Exo-Terra line looked promising but I'll only purchase Reptisun bulbs from here on out. I've included some photos (UVB100 aka Repti-Glo 5.0, UVB150 aka Repti-Glo 10.0, Natural Light aka Repti-Glo 2.0 and a Reptisun 13w mini cf) for comparison. UPDATE: Ordered the Reptisun and it arrived fully functional. Not sure why Exo-Terra is having such an issue with theirs
